EMERGENCY OVERVIEW
Each Dipyridamole Tablet, USP intended for oral administration contains Dipyridamole and excipients generally considered to be non-toxic and non-hazardous in small quantities and under conditions of normal occupational exposure.

Section 1. Identification

Identification of the product

Product name: Dipyridamole Tablets USP
Formula: C_{24}H_{40}N_{8}O_{4}
Chemical Name: 2,2',2'',2'''-[(4,8-Dipiperidinopyrimido[5,4-d]pyrimidine-2,6-diyl)dinitrilo]-tetraethanol.

Manufacturer / supplier identification

Company: Cadila Healthcare Ltd. Ahmedabad, India
Contact for information: Tel.: +91 79 6868100 Fax: +91 79 3750319
Emergency Telephone No. Tel.: +91 79 6868100

Recommended use / Therapeutic Category
Platelet inhibitor.

Restriction on Use / Contraindications: Hypersensitivity to dipyridamole and any of the other components.
DIPYRIDAMOLE TABLETS, USP

Section 2. Hazard(s) Information

Dose and Administration
The recommended dose is 75 to 100 mg four times daily as an adjunct to the usual warfarin therapy.

Adverse Effects
Adverse reactions at therapeutic doses are usually minimal and transient. On long-term use of dipyridamole tablets initial side effects usually disappear. The Dizziness, Abdominal distress, Headache and Rash were reported in two heart valve replacement trials comparing dipyridamole tablets and warfarin therapy to either warfarin alone or warfarin and placebo. Other reactions from uncontrolled studies include diarrhea, vomiting, flushing and pruritus.

Over Dose Effect
In case of real or suspected overdose, seek medical attention or contact a Poison Control Center immediately. Careful medical management is essential. Based upon the known hemodynamic effects of dipyridamole, symptoms such as warm feeling, flushes, sweating, restlessness, feeling of weakness and dizziness may occur. A drop in blood pressure and tachycardia might also be observed.

Medical Conditions
Coronary Artery Disease:
Dipyridamole has a vasodilatory effect and should be used with caution in patients with severe coronary artery disease. Chest pain may be aggravated in patients with underlying coronary artery disease who are receiving dipyridamole.

Hepatic Insufficiency:
Elevations of hepatic enzymes and hepatic failure have been reported in association with dipyridamole administration.

Hypotension:
Dipyridamole should be used with caution in patients with hypotension since it can produce peripheral vasodilation.

Laboratory Tests:
Dipyridamole has been associated with elevated hepatic enzymes.

Contraindications
Hypersensitivity to dipyridamole and any of the other components.

Pregnancy Comments
Teratogenic Effects:
Reproduction studies have been performed in mice, rabbits and rats at oral dipyridamole doses of up to 125 mg/kg, 40 mg/kg and 1000 mg/kg, respectively (about 1 1/2, 2 and 25 times the maximum recommended daily human oral dose, respectively, on a mg/m² basis) and have revealed no evidence of harm to the fetus due to dipyridamole.

Nursing Mothers:
As dipyridamole is excreted in human milk, caution should be exercised when dipyridamole tablets are administered to a nursing woman.

Pregnancy Category B

Section 4. First - aid measures

- **General**: Remove from exposure. Remove contaminated Clothing. Person developing serious hypersensitivity reaction must receive medical attention.

- **Overdose Treatment**: Symptomatic treatment is recommended, possibly including a vasoressor drug. Gastric lavage should be considered. Administration of xanthine derivatives (e.g., aminophylline) may reverse the hemodynamic effects of dipyridamole overdose. Since dipyridamole is highly protein bound, dialysis is not likely to be of benefit.

Section 5. Fire - fighting measures

- **Flash point**: Not Found
- **Auto-Ignition Temperature**: Not Found
- **Extinguishing Media**: Water Spray, dry chemical, carbon dioxide or foam as appropriate for surrounding fire and material.
- **Upper Flammable Limit**: Not Found
- **Lower Flammable Limit**: Not Found
- **Fire and Explosion Hazard**: This material is assumed to be combustible. As with all dry powders it is advisable to ground...
Fire Fighting Procedure  
As with all fires, evacuate personnel to a safe area. Fire fighter should use self-contained breathing equipment and protective clothing.

Section 6. Accidental Release Measures

Spill Response  
Wear approved respiratory protection, chemically compatible gloves and protective clothing. Wipe up spillage or collect spillage using high efficiency vacuum cleaner. Avoid breathing dust. Place spillage in appropriately labelled container for disposal. Wash spill site.

Section 7. Handling and Storage

Storage  
Store at 20° to 25°C (68° to 77°F) in a dry place and protect from light. Dispense in a tight, light-resistant container.

Incompatibilities: No Data available.

Section 8. Exposure controls / personal protection

Respiratory Protection  
Protection from inhalation is not normally necessary. If ventilation is inadequate or dust is likely to generate, use of suitable dust mask would be appropriate.

Skin Protection  
Skin protection is not normally necessary, however it is good practice to avoid contact with chemical to use suitable gloves when handling.

Eye protection  
Eye protection is not normally necessary. If concerned wear protective goggles or glasses. Wash hands prior to touching eye and in particular handling contact lenses.

Protective Clothing  
Protective clothing is not normally necessary, however it is good practice to use apron.

Section 9. Physical and chemical properties

Appearance  
Dipyridamole Tablets USP, 25 mg are light yellow, round, biconvex, film-coated tablets debossed with ‘ZE 43’ on one side and plain on the other side.

Dipyridamole Tablets USP, 50 mg are light yellow, round, biconvex, bevelled-edge, film-coated tablets debossed with ‘ZE 49’ on one side and plain on the other side.

Dipyridamole Tablets USP, 75 mg are light yellow, round, biconvex, bevelled-edge, film-coated tablets debossed with ‘ZE 50’ on one side and plain on the other side.
**Safety Data Sheet**
**DIPYRIDAMOLE TABLETS, USP**

**Strength:** 25/50/75mg.  
**Pack Size:** Bottle of 100/500/1000 Tablets  
Blister of 100 Tablets  
**Revision No.:** 02

**Section 11. Toxicological information**

**General**  
Handling of formulated product is not expected to cause any toxicological affects. The data pertains to the ingredient in formulations, rather than this specie formulation.

**Target organ**  
Eye contact, Skin contact and inhalation is not great risk as this product is tablet.

**Other**  
Carcinogenesis, Mutagenesis, Impairment of Fertility: In studies in which dipyridamole was administered in the feed to mice (up to 111 weeks in males and females) and rats (up to 128 weeks in males and up to 142 weeks in females), there was no evidence of drug-related carcinogenesis. The highest dose administered in these studies (75 mg/kg/day) was, on a mg/m² basis, about equivalent to the maximum recommended daily human oral dose (MRHD) in mice and about twice the MRHD in rats. Mutagenicity tests of dipyridamole with bacterial and mammalian cell systems were negative. There was no evidence of impaired fertility when dipyridamole was administered to male and female rats at oral doses up to 500 mg/kg/day (about 12 times the MRHD on a mg/m² basis).
Section 12. Ecological information

Do not allow product to enter drinking water supplies, waste water or soil

Section 13. Disposal Consideration

Dispose the waste in accordance with all applicable Federal, State and local laws.

Section 14. Transport Information

The product is not hazardous when shipping via air (IATA), ground (DOT), or sea (IMDG).

Section 15. Regulatory Information

Generic Medicine. Approved by USFDA & the ANDA Number is 40874

Section 16. Other information

None

Date of issue: 28/05/2015

The information contained herein is based on the state of our knowledge. It characterises the product with regard to the appropriate safety precautions. It does not represent a guarantee of the properties of the product.
