

Material Safety data sheet

DIVALPROEX SODIUM DELAYED RELEASE TABLETS USP

Strength: 125/250/500 mg.

Pack Size: Bottles of 100/500 Tablets

Revision No.: 00

EMERGENCY OVERVIEW

DIVALPROEX SODIUM contains Divalproex Sodium equivalent to Valproic Acid and excipients generally considered to be non-toxic and non-hazardous in small quantities and under conditions of normal occupational exposure.

Section 1. Identification of the substance

Identification of the product

Product name: Divalproex Sodium Delayed Release Tablets
Formula: C₁₆H₃₁NaO₄
Chemical Name: Sodium Hydrogen bis (2-propylpentanoate)
Therapeutic Category: AntiManic Agent, Anticonvulsant, GABA Agent.

Manufacturer / Supplier Identification

Company: Cadila Healthcare Ltd. Ahmedabad, India
Contact for information: Tel.: +91 79 6868100 Fax: +91 79 3750319
Emergency telephone No. Tel.: +91 79 6868100

Section 2. Composition / information on ingredients

Component	Exposure Limit	CAS No.
Principle Component :		
Divalproex Sodium 125, 250 & 500 mg	Not Found	76584-70-8
Inactive Ingredients :		
colloidal silicon dioxide	Not Found	7631-86-9
corn starch	Not Found	523-577
hypromellose	Not Found	NA
magnesium stearate	Not Found	557-04-0
methacrylic acid copolymer dispersion	Not Found	79-41-4

Material Safety data sheet

DIVALPROEX SODIUM DELAYED RELEASE TABLETS USP

Strength: 125/250/500 mg.

Pack Size: Bottles of 100/500 Tablets

Revision No.: 00

microcrystalline cellulose	Not Found	9004-34-6
polyethylene glycol	Not Found	25322-68-3
sodium starch glycolate	Not Found	NA
talc	Not Found	14807-96-6
triethyl citrate	Not Found	NA
povidone	Not Found	9003-39-8

Section 3. Health Hazards Information

Dose and Administration

For Mania:

Initial Dose – 750 mg daily, which should be gradually increased to achieve lowest therapeutic clinical dose which produces clinical effect.

For Epilepsy:

Monotherapy and Adjunctive Therapy in complex partial seizures in adults & pediatric patients down the age of 10 years & in simple and complex absence seizures.

Monotherapy: 10 to 15 mg/kg/day, gradually increased by 5 to 10 mg/kg/week

Adjunctive Therapy: 10 to 15 mg/kg/day, gradually increased by 5 to 10 mg/kg/week

Simple & Complex Absence Seizures: 15 mg/kg/day, gradually increased by 5 to 10 mg/kg/day until seizures are controlled.

Adverse Effects

Mania:

Nausea, Somnolence, Dizziness, Vomiting, Asthenia, Abdominal Pain, Dyspepsia, Rash

Migraine:

Gastrointestinal System:- Nausea, Dyspepsia, Diarrhea, Vomiting, Abdominal Pain, Increased Appetite.

Nervous System:- Asthenia, Somnolence, Dizziness, Tremor

Others:- Weight Gain, Back Pain, Alopecia.

Epilepsy:

Body as a whole: Headache, Asthenia, Fever.

Gastrointestinal System: Nausea, Vomiting, Abdominal Pain, Diarrhea, Anorexia, Dyspepsia, Constipation.

Nervous System: Somnolence, Tremor, Dizziness, Diplopia, Blurred Vision, Ataxia, Nystagmus, Thinking abnormal, Amnesia.

Respiratory System:- Flu Syndrome, Infection, Bronchitis, Rhinitis.

Others:- Alopecia, Weight Loss.

Material Safety data sheet

DIVALPROEX SODIUM DELAYED RELEASE TABLETS USP

Strength: 125/250/500 mg.

Pack Size: Bottles of 100/500 Tablets

Revision No.: 00

Over Dose Effect

Overdosage with valproate may result in somnolence, heart block, and deep coma. Fatalities have been reported; however patients have recovered from valproate levels as high as 2120 mcg/ml.

In overdose situations, the fraction of drug not bound to protein is high and hemodialysis or tandem hemodialysis plus hemoperfusion may result in significant removal of drug. The benefit of gastric lavage or emesis will vary with the time since ingestion. General supportive measures should be applied with particular attention to the maintenance of adequate urinary output.

Naloxone has been reported to reverse the CNS depressant effects of valproate overdose. Because naloxone could theoretically also reverse the antiepileptic effects of valproate, it should be used with caution in patients with epilepsy.

Contraindications

DIVALPROEX SODIUM SHOULD NOT BE ADMINISTERED TO PATIENTS WITH HEPATIC DISEASE OR SIGNIFICANT HEPATIC DYSFUNCTION.

Divalproex sodium is contraindicated in patients with known hypersensitivity to the drug.

Divalproex sodium is contraindicated in patients with known urea cycle disorders

Pregnancy Comments

Valproate Can Produce Teratogenic Effects. Data Suggest That There Is An Increased Incidence Of Congenital Malformations Associated With The Use Of Valproate By Women With Seizure Disorders During Pregnancy When Compared To The Incidence In Women With Seizure Disorders Who Do Not Use Antiepileptic Drugs During Pregnancy, The Incidence In Women With Seizure Disorders Who Use Other Antiepileptic Drugs, And The Background Incidence For The General Population. Therefore, Valproate Should Be Considered For Women Of Childbearing Potential Only After The Risks Have Been Thoroughly Discussed Wth The Patient And Weighed Against The Potential Benefits Of Treatment.

There Are Multiple Reports In The Clinical Literature That Indicate The Use Of Antiepileptic Drugs During Pregnancy Results In An Increased Incidence Of Congenital Malformations In Offspring. Antiepileptic Drugs, Including Valproate, Should Be Administered To Women Of Childbearing Potential Only If They Are Clearly Shown To Be Essential In The Management Of Their Medical Condition.

Pregnancy Category

D

Material Safety data sheet

DIVALPROEX SODIUM DELAYED RELEASE TABLETS USP

Strength: 125/250/500 mg.

Pack Size: Bottles of 100/500 Tablets

Revision No.: 00

Section 4. First aid measures

General	Remove from exposure. Remove contaminated Clothing. Person developing serious hypersensitivity reaction must receive medical attention
Overdose Treatment	Naloxone has been reported to reverse the CNS depressant effects of valproate overdose. Because naloxone could theoretically also reverse the antiepileptic effects of valproate, it should be used with caution in patients with epilepsy.

Section 5. Fire – fighting measures

Flash point	Not Found	Upper Flammable Limit:	Not Found
Auto-Ignition Temperature:	Not Found	Lower Flammable Limit:	Not Found
Extinguishing Media	Water Spray, dry chemical, carbon dioxide or foam as appropriate for surrounding fire and material.	Fire and Explosion Hazard	This material is assumed to be combustible. As with all dry powders it is advisable to ground mechanical equipment in contact with the dry material to dissipate the potential build up of static electricity.
Fire Fighting Procedure	As with all fires, evacuate personnel to a safe area. Fire fighter should use self- contained breathing equipment and protective clothing.		

Section 6. Storage / Spill / Disposal Measures

Storage	Store at 20°-25°C (68°-77°F) Dispense in a tight, light-resistant container.
---------	---

Material Safety data sheet

Strength: 125/250/500 mg.

Pack Size: Bottles of 100/500 Tablets

Revision No.: 00

Spill Response	Wear approved respiratory protection, chemically compatible gloves and protective clothing. Wipe up spillage or collect spillage using high efficiency vacuum cleaner. Avoid breathing dust. Place spillage in appropriately labelled container for disposal. Wash spill site.
Disposal	Dispose the waste in accordance with all applicable Federal, State and local laws.

Section 7. Exposure controls and personal protection

Respiratory Protection	Protection from inhalation is not normally necessary. If ventilation is inadequate or dust is likely to generate, use of suitable dust mask would be appropriate.
Skin Protection	Skin protection is not normally necessary, however it is good practice to avoid contact with chemical to use suitable gloves when handling.
Eye protection	Eye protection is not normally necessary. If concerned wear protective goggles or glasses. Wash hands prior to touching eye and in particular handling contact lenses.
Protective Clothing	Protective clothing is not normally necessary, however it is good practice to use apron.

Section 8. Physical and chemical properties

Appearance	white powder with a characteristic odour.	Odour	Characteristic Odour
Solubility in water	Soluble in ethanol (95%), methanol, IPA & partially soluble in water & ether.	Melting Point	222 ⁰ c
Boiling point	No Data Available	Vapour density	No Data Available
Evaporation rate	No Data Available	Evaporation rate	No Data Available
Reactivity in water	No Data Available	Specific gravity	No Data Available
% Volatile by volume	No Data Available	Vapour pressure	No Data Available

Other information Divalproex sodium is a stable co-ordination compound comprised of sodium valproate and valproic acid in a 1:1 molar relationship and formed during the partial neutralization of valproic acid with 0.5 equivalent of sodium hydroxide.

Section 9. Physical Hazards

Condition to avoid	Avoid exposure to extreme heat, light and moisture.	Stable	Stable under normal ambient and anticipated storage and handling conditions.
Decomposition Products	No Data Available	Hazardous Reaction	No data available.
Incompatibilities	No data available.		

Section 10. Toxicological information

Handling of formulated product is not expected to cause any adverse affects. The data pertains to the ingredient in formulations, rather than this specie formulation.

Target organ Eye contact, Skin contact and inhalation is not great risk as this product is tablet.

Other **HEPATOTOXICITY:**
Hepatic Failure Resulting In Fatalities Has Occurred In Patients Receiving Valproic Acid And Its Derivatives. Experience Has Indicated That Children Under The Age Of Two Years Are At A Considerably Increased Risk Of Developing Fatal Hepatotoxicity, Especially Those On Multiple Anticonvulsants, Those With Congenital Metabolic Disorders, Those With Severe Seizure Disorders Accompanied By Mental Retardation, And Those With Organic Brain Disease. When Divalproex Sodium Delayed-Release Tablets Are Used In This Patient Group, It Should Be Used With Extreme Caution And As A Sole Agent. The Benefits Of Therapy Should Be Weighed Against The Risks. Above This Age Group, Experience In Epilepsy Has Indicated That The Incidence Of Fatal Hepatotoxicity Decreases Considerably In Progressively Older Patient Groups.

Material Safety data sheet

DIVALPROEX SODIUM DELAYED RELEASE TABLETS USP

Pack Size: Bottles of 100/500 Tablets

Revision No.: 00

These Incidents Usually Have Occurred During The First Six Months Of Treatment. Serious Or Fatal Hepatotoxicity May Be Preceded By Non-Specific Symptoms Such As Malaise, Weakness, Lethargy, Facial Edema, Anorexia, And Vomiting. In Patients With Epilepsy, A Loss Of Seizure Control May Also Occur. Patients Should Be Monitored Closely For Appearance Of These Symptoms. Liver Function Tests Should Be Performed Prior To Therapy And At Frequent Intervals Thereafter, Especially During The First Six Months.

TERATOGENICITY:

Valproate Can Produce Teratogenic Effects Such As Neural Tube Defects (E.G., Spina Bifida). Accordingly, The Use Of Divalproex Sodium Delayed-Release Tablets In Women Of Childbearing Potential Requires That The Benefits Of Its Use Be Weighed Against The Risk Of Injury To The Fetus. This is Especially Important When The Treatment Of A Spontaneously Reversible Condition Not Ordinarily Associated With Permanent Injury Or Risk Of Death (E.G., Migraine) Is Contemplated.

A PATIENT INFORMATION LEAFLET DESCRIBING THE TERATOGENIC POTENTIAL OF VALPROATE IS AVAILABLE FOR PATIENTS.

PANCREATITIS:

Cases Of Life-Threatening Pancreatitis Have Been Reported In Both Children And Adults Receiving Valproate. Some Of The Cases Have Been Described As Hemorrhagic With A Rapid Progression From Initial Symptoms To Death. Cases Have Been Reported Shortly After Initial Use As Well As After Several Years Of Use. Patients And Guardians Should Be Warned That Abdominal Pain, Nausea, Vomiting, And/Or Anorexia Can Be Symptoms Of Pancreatitis That Require Prompt Medical Evaluation. If Pancreatitis Is Diagnosed, Valproate Should Ordinarily Be Discontinued. Alternative Treatment For The Underlying Medical Condition Should Be Initiated As Clinically Indicated.
